

Junior Python Developer

We're looking for **Junior Python Developers** who want to join our team in **Cluj-Napoca**, to help us develop new products, test, improve and maintain them in a « rapid prototyping » & open-systems environment.

iBrowse runs an international network for thousands of clients, and supports their communications needs for mission-critical applications. Our software products are internal as well as customer facing.

Benefits:

- being a part of a talented, engaged and enthusiastic team
- working with popular and up-and-coming frameworks (Django, FastAPI)
- continuous mentorship and learning opportunities
- the possibility to travel and/or work in Paris at the company HQ
- medical subscription
- fun times with the team (teambuilding, parties)

Responsibilities:

- Working on existing code base, fixing bugs and writing new features
- Developing new applications in a microservices architecture
- Writing unit and functional tests for the newly created apps

Requirements:

- Your English language skills need to be advanced; French is a plus.
- Basic knowledge of Python; experience with Flask/Django/FastAPI is an advantage
- Willingness to learn and good social skills
